Who is InterVision?

InterVision Systems Technologies Inc. is an innovative infrastructure solutions and consulting company, designing and implementing end-to-end technology solutions for enterprises, service providers, technical computing companies and e-businesses. We act as a trusted advisor to our clients, offering best-of-breed solutions in **Storage, Networking, Security, and Messaging solutions**, with an objective to architect and implement a solution with our client's best interests being paramount.

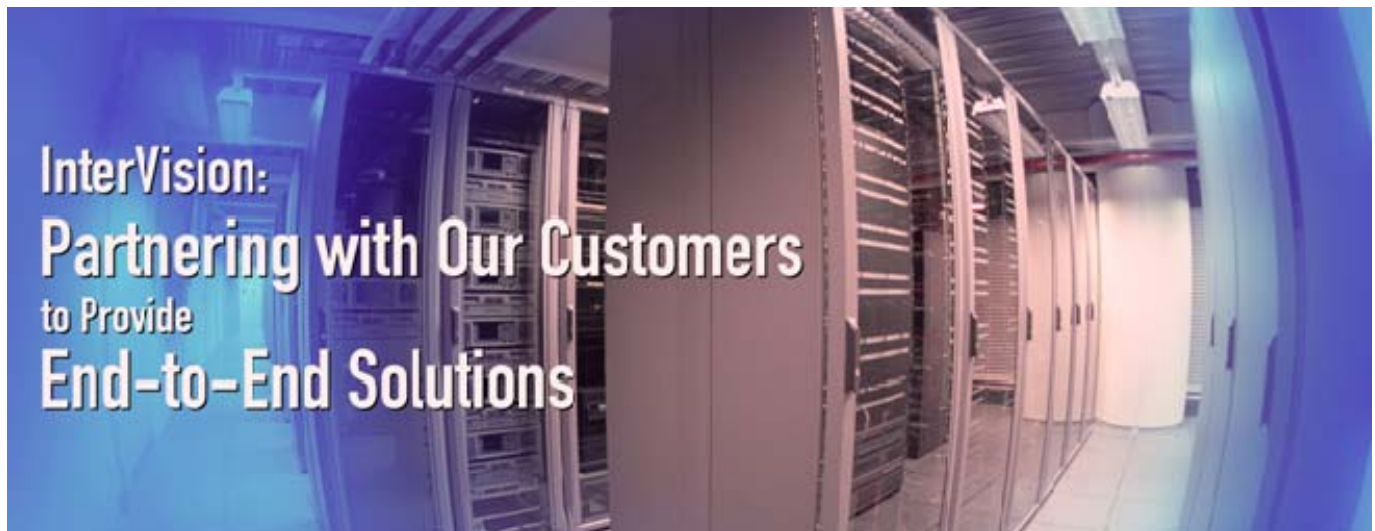

Our teams of certified engineers, consultants, and Professional Service Organization (PSO) have one mission in mind; to fully understand our client's business goals in order to provide a clear, unbiased recommendation and help lower the total cost of ownership. We identify the problem, architect and design a detailed technical solution, document and engineer the plan, implement all phases, test and provide ongoing support. This is our time-tested methodology that works every time.

Founded in 1993, **InterVision Systems Technologies Inc.** has been successfully helping companies meet their business objectives with technology solutions designed specifically for them, allowing them to focus on their core competencies and compete efficiently in the marketplace long term.

How is InterVision Different?

By working as trusted advisors with our clients, **InterVision Systems Technologies Inc.** provides rapid design and deployment of best-of-class solutions allowing our clients to focus on their core competencies. Many "integrators" align themselves closely with one or two manufacturers and attempt to sell that limited solution set into every environment. This is NOT our methodology. We provide a full range of technologies our clients need for their entire infrastructure.

In our testing labs we are constantly evaluating new products for features, reliability, and innovative functionality. It is our breadth of understanding of a wide array of technologies that empowers us to specify the right solution for our clients' unique environment.

Storage Solutions

At **InterVision** we recognize that the virtualization, storage devices, storage network, computer systems and

applications are all a part of one interdependent system and that you need a solution that is right for your company. With **InterVision's** industry-certified staff of professionals, world-class vendor partners, and proven integration ability, we can help you build a storage solution that fits your business needs now and in the future.

Messaging Solutions

InterVision has a vision to solve all three of the biggest challenges with messaging systems for Exchange Administrators: Database

Failure and Recovery; Database Growth; and PST file management solution. **InterVision** has a vision to solve all three of your problems areas.

Networking Solutions

InterVision specializes in building high-speed gigabit LANs, WANs and WLANs. We understand the entire range of issues a company

struggles with in building high-speed networks. It is our understanding of information systems as a whole, which allows us to build information delivery systems that are fast, reliable, scalable, and manageable.

Professional Services Organization

Our Professional Services Organization initially performs a need analysis to identify your company's

core challenges. Then we architect a solution using best of breed technologies before selecting software or hardware resources. That way, we assure that we are offering the best solution while maintaining the control and quality of the solution.

Security Solutions

InterVision has created a Layered Stack approach and has partnered with the leading vendors in each category to ensure the best

possible solution for each of our clients. We have advanced expertise in firewall, IDS/IDP solutions, VPN, access control, and antivirus solutions and offer a Security Assessment to help understand all aspects of your security needs.

Our Professional Services Organization has a track record of success with many effective technology implementations to our credit. **InterVision's** Professional Services Organization is comprised of a team with great people skills, strong project management capabilities, and in-depth knowledge of the latest technologies.
