

Staff Augmentation

A full range of staff augmentation services to meet your changing business needs

In today's dynamic business environment, projects, priorities and budgets can change overnight. As a result, IT departments must be able to rapidly adjust their staffing levels and effectively control costs.

InterVision provides proven, experienced IT professionals when and where you need them—placing the right talent for your demanding technical projects. Our staff augmentation services are designed to provide day-to-day on-site support on a short- or long-term basis. With 20 years of experience and thousands of deployments, we have the knowledge and expertise to bring you the consultant that can get the job done right.

InterVision engineering consultants have hands-on experience with complex IT production environments. Our engineers average 15 years of technology experience and collectively have more than 300 technical certifications. Unlike other solution providers that have experience in only a few practice areas, our staff of more than 50 systems engineers have specialized expertise and are cross-trained in all areas critical to IT environments, including security, networking, enterprise applications, cloud, wireless, storage and virtualization. You will benefit from a consultant that has a holistic view of IT.

Why partner with InterVision?

- **MANAGE COSTS** by utilizing IT professionals without a long-term commitment of a permanent hire
- **TACKLE COMPLEX PROJECTS** more quickly with trained, vendor certified professionals
- **GAIN ACCESS** to the expertise and knowledge of the entire InterVision engineering staff, not just the engineer on site
- **SAVE MONEY** in benefits and other employment costs since the consultant isn't one of your employees
- **REDUCE RAMP-UP** time by bringing on IT consultants that are already familiar with the technologies in your environment, and are trained and ready to maintain, and troubleshoot the environment

Consultants matched to your needs

InterVision takes the time to understand your business requirements, project needs and goals. With this information, we match you with consultants that have the necessary training and experience to deliver the services required. If you are already an InterVision customer, we usually place an engineer that is already intimately familiar with your environment.

InterVision unlocks value by delivering innovative technology through a consultative approach.

Storage: Let InterVision's storage consultants provide on-site expertise to architect, plan, implement, integrate or maintain your storage environment. InterVision has designed and installed hundreds of complex storage systems and we have placed many storage consultants in staff augmentation positions. Our trained, vendor-certified consultants have specialized experience on technologies from the leading storage vendors, including NetApp, Hewlett Packard, Hitachi Data Systems, EMC and Dell.

Data Center Virtualization: InterVision consultants can help you virtualize all your key IT resources, including servers, storage, networks, applications and operating systems. InterVision has helped hundreds of customers implement enterprise-wide virtualization initiatives. Our consultants have certifications and expertise with the top virtualization tools from the leading vendors, including VMware, Citrix and Microsoft.

Networking: Today's network infrastructure environments, which are critical to business operations, are more complex than ever before. That's why it is important to augment your staff with trained, certified network professionals. InterVision is available to help you architect, design, engineer, deploy and support your network systems including WLANs, campus/office LANs, WANs, data centers, and Internet services.

Project Management: Let InterVision's experienced project management staff work on-site to manage all aspects of your complex IT infrastructure projects. From simple controller upgrades to complex datacenter architecture, our consultants bring the right resources to bear, at the right time, to help ensure every project is a success. Our project managers follow a well-defined methodology based on hundreds of IT infrastructure deployments.

NetApp Help Desk: Do you need qualified support personnel for your NetApp system? InterVision consultants are experts on NetApp and understand a wide array of technologies, which means they have what it takes to quickly identify and resolve storage problems. InterVision is one of the largest NetApp partners on the West Coast and we have deployed more than 1,000 storage systems for SMBs to large enterprises. You can be confident that our qualified consultants can handle your day-to-day NetApp support needs.

Enterprise Applications and Platforms Enterprise applications are highly complex, mission-critical systems. When you need expert staff to install, upgrade, manage, or troubleshoot your enterprise applications, InterVision can help. With experience from thousands of IT infrastructure deployments, InterVision understands how to create environments optimized for application requirements. Our consultants have specialized expertise on leading applications and platforms, including Oracle, Microsoft SharePoint and Exchange, PeopleSoft and Unix.

Backup and Disaster Recovery: Organizations need a strategy to recovery quickly from any type of disruption, whatever its size or cause. Our expert consultants know how to select and deploy the right architecture and replication technologies to meet specific business requirements. InterVision consultants are available to work on site to help your organization fully protect your data and meet recovery objectives.

NetApp Help Desk: Do you need qualified support personnel for your NetApp system? InterVision consultants are experts on NetApp and understand a wide array of technologies, which means they have what it takes to quickly identify and resolve storage problems. InterVision is one of the largest NetApp partners on the West Coast and we have deployed more than 1,000 storage systems for SMBs to large enterprises. You can be confident that our qualified consultants can handle your day-to-day NetApp support needs.
